

# 1973-1974 B Body Manual Sunroof Production

by Scott Rudge – moparsunroofregistry@gmail.com

The 1973 & 1974 manual sunroof B-bodies were much more plentiful than their power sunroof predecessors. American Sunroof Corp produced a sunroof kit that Chrysler could install right on the assembly line, instead of pulling the cars off the line into a side room. With the sunroof installation streamlined and the change to manual operation, the price of the sunroof option was essentially cut in half. This made the manual sunroof a more attractive option for the customer.

**1973 Dodge Charger** – Manual sunroof cars shipped to the US market: **3,097**.

- Available on all Coupe and Two-Door Hardtop models with vinyl roof.
- Charger Coupe (WL21) - **47**
- Charger/Charger Rallye (WH23) - **556**
